

Private higher education institution

INSTITUTE OF PSYCHOLOGY AND ENTREPRENEURSHIP

"Nature gives potential to everyone, giving selfishness, instinct to be the best in the world, but few people know how to build, to create themselves. From the point of view of instinct – everyone is first and nobody is second. It is necessary to learn how to realize the instinct of superiority given by nature".

(c) professor Antonio Meneghetti

ABOUT THE INSTITUTE OF PSYCHOLOGY AND ENTREPRENEURSHIP

The Institute of psychology and entrepreneurship is a challenge for creating a new quality educational environment.

The Institute's team shares the sustainable development goals (hereinafter – SDG), which were approved in 2015 at the UN summit on sustainable development.

The SDR are a common agenda for all. In practice, this means that there are many options for participating in the implementation of the program: consulting and defining new policies and programs, implementing specific goals, influencing changes in cultural and behavioral stereotypes and many other opportunities for realizing the transformational potential of SDR.

MISSION OF THE INSTITUTE

The mission of the IPE is based on the principles of ontopsychological pedagogy – to teach a person to understand and create himself, to educate himself as a leader in this world, to develop the ability to win.

STRATEGIC GOAL

Founding an Institute – a scientific environment in Ukraine, which based on the methodology of humanistic, existential psychology and methodology of ontopsychotherapy, produces innovations and contributes the development of person's creative potential, leadership and active life position.

VALUES OF THE INSTITUTE

- Humanism
- Personality
- Spirituality
- Leadership-service
- Freedom
- Responsibility
- Professionalism
- Civil identity

LOCATION OF THE INSTITUTE

Private higher education institution «**INSTITUTE OF PSYCHOLOGY AND ENTREPRENEURSHIP**» is located on the territory of ecobiological center **Aletheia**.

- Creative space
- Majestic architecture
- Own library
- Place of inspiration and creative thinking

Silence, nature and the surrounding harmony – all this in symbiosis creates ideal conditions for learning, knowledge and creativity.

MAIN DIRECTIONS OF THE INSTITUTE'S FUNCTIONING

The achievement of the Institute's strategic goal is implemented according to the following strategic priorities, which determine the main directions of the Institute's functioning:

- The Institute's educational process is based on the idea of an organic connection of science and education. One of the tasks is to preserve and deepen the principle of Liberal Arts Education as a necessary condition for the formation of a highly educated, creative personality – a leader.
- Ensuring the formation of high-quality educational services in accordance with international standards and further integration of the Institute into the educational environment.
- The training programs are based on innovative author's courses, elements of problem-based learning are introduced in order to develop students' creative and critical thinking and acquire professional skills. Has been introduced the practice of comparing several teachers of one academic discipline according to the principles of interdisciplinarity.

- Improving the methodological, organizational, legal and financial framework for ensuring academic mobility of students, trainees and teachers, as well as for developing dual and joint degree programs.
- Adoption and implementation of a large-scale program of informatization of the Institute for the purpose of optimal and effective organization of educational, scientific and managerial activities.

- It ensures that the structure and content of the educational process are adapted in advance of the society's long-term needs. Conditions have been created for students to freely choose the share of higher education content in the amount of at least 25% of the total time. State-of-the-art technologies have been introduced to ensure learning outcomes.
- In order to ensure the successful entry of graduates into the labor market, the Institute is developing mechanisms to ensure a combination of theoretical and applied aspects of training, the introduction of the principles of dual education, strengthening cooperation with business, government agencies and non-governmental organizations in this direction.
- The Institute has created conditions for professional growth and advanced training of scientific and pedagogical staff.
- Modern educational programs have been developed to meet the learning needs of all age groups of citizens on the principle of Life Long Learning. In particular, the development of educational programs «HR-management», «Business Psychology», «Communication Management» was provided.

- The Institute has implemented a system of attracting capable, responsible, active, creative people, who share the Institute's values.
- The fight against plagiarism is determined as general and extremely important task of students and teaching staff of the Institute.

- Presentation of the Institute's scientific achievements at national and international scientific, practical and innovative conferences and exhibitions by increasing funding for relevant business trips.
- Has been started the creation of the Institute's library as a scientific, cultural and educational cell of Ukraine and Kiev. Mechanisms for the development of the institutional repository have been developed for the purpose of presenting scientific achievements in the open access and ensuring that interested business structures have access to the developments of the Institute's research and production enterprise.
- Intensification of the Institute's participation in international and European associations of research universities and the Magna Charta of universities. Expansion of cooperation in the framework of the existing and most fruitful partnerships. Development of double degree programs at the Institute.
- Updating the Institute's fundamental research. Obtaining new scientific knowledge and its direction for the creation and introduction of new competitive technologies, types of equipment, materials for ensuring innovative development of society, training of competent specialists in accordance with the requirements of the labor system.
- Based on the concept of corporate culture, was organized a system for improving the psychological and pedagogical climate of the Institute. Improving the algorithms of team activity based on the awareness of the interdependence of results. Formation of autonomy and responsibility among the members of the labor collective as the ability to independently perform tasks and be responsible for the results.
